

Glove Dispensing System

SafeDon™

Introducing SafeDon™ – a new innovation in glove dispensing.

The SafeDon™ concept has been launched to provide a quick, hygienic and economic glove dispensing system for medical environments and has been specially designed to help combat the problem of cross contamination of gloves, glove boxes and dispensers when donning disposable gloves.

In a recent study SafeDon™ packed gloves had 92.5% less contamination than traditionally packed gloves

- New cuff 1st dispensing system - hygienic system for dispensing and donning gloves. Each glove is dispensed individually and can be donned hygienically cuff 1st without touching the fingers and palm areas of the glove, helping to reduce the potential risk of cross contamination
- Time efficient - fast, easy dispensing saves time and patients waiting
- Cost effective - minimise glove wastage as gloves are dispensed individually and disused gloves cannot be put back into the box which helps further reduce cross contamination
- Ergonomically designed dispenser - keeps gloves away from contaminated surfaces and can be wiped down to maintain hygiene. It features an anti-microbial additive and has been designed without joins to avoid harbouring bacteria and trapping moisture

New

“The future is in your hands, you can help reduce the spread of infection and the associated financial burden on resources”

Latex Gloves - High Protection

Recommended when there is a high risk of exposure to blood and blood stained body fluids.

- Manufactured to the highest quality standards - BS EN455 AQL 1.5
- Reliable and provide outstanding value for money
- Textured to provide excellent grip and touch sensitivity
- Safe to use - they contain low levels of protein and residual chemicals minimising the risks of adverse skin reactions
- Powder free with strong beaded cuffs

2L005	Powder Free Latex Gloves Extra Large	1x100	P.O.A

Nitrile Gloves - High Protection

These gloves are a suitable alternative for areas where a patient or health care worker is latex sensitised.

- Soft, supple and comfortable to wear
- They are significantly stronger than latex and are also recommended for high risk procedures
- Contain no natural rubber latex, no protein or powder, eliminating the risks of powder induced contamination and skin allergies
- Manufactured to BS EN455

CODE	DESCRIPTION	QTY.	PRICE
NPFS100	Powder Free Nitrile Gloves Small	1x100	£4.95
