

The Cutan 3-Step Approach To Hand Hygiene

Cutan
MEDICAL HAND HYGIENE

Step 1 Hand Cleansing

Hand cleansing is the fundamental step in hand hygiene 'best practice'. Apart from cleaning any visible soiling from hands, the physical action of good hand washing technique will remove high levels of bacteria and viruses also present on the skin. All Cutan soaps are very carefully formulated to be extremely mild, encouraging frequent usage and staff compliance.

Cutan Foaming Soap

Mild and lightly fragranced for frequent use.

- pH neutral to lessen the impact on skin
- Quick rinsing - to speed up hand washing
- Instant foaming - making hand washing faster
- Economical - up to 1660 hand washes from every cartridge

Step 2 Hand Sanitising

Hand sanitising is very useful in reducing bacterial counts on visibly clean hands when access to soap and running water is inconvenient.

Cutan Foam Hand Sanitiser

Revolutionary alcohol skin sanitiser delivered as a foam.

- Pleasant to use - rich foam for frequent use in between hand washing
- Glove compatible - following use, gloves can be easily and quickly applied
- Non toxic, hypoallergenic and non-irritant
- Conditions skin - contains conditioner to help prevent skin dryness

- Instant action - rapid activity against many common organisms in only 15 seconds
- Economical in use - controlled dosage spreads easily across the skin
