

Machine Dishwasher Auto Dosing Systems

Our auto dosing systems are designed to automate the most basic liquid feeding tasks. If you are looking for a system that can automatically regulate detergent levels in your dishwasher then a look at our auto dosing systems is a must. We also offer complete after sales service on all of our products.

How Automatic Dosing Will Benefit You:

- Accurate results and consistent cleaning performance with correct dose every time
- NO costly wastage by overdosing + NO messy spillage
- Fewer breakdowns - manual dosing allows clogging of machines tubes
- NO direct contact with potentially hazardous substances
- Better quality products and more cost effective than manual dosing which means savings
